

TILT MARBLE PLINTHS CARE INSTRUCTIONS

CLEANING

- The marble is finished with a food safe 'Stain Stop' finish to protect against oil, grease and water. These substances can be removed with standard surface cleaner within 12 hours of contact.
- Please note: 'Stain stop' does **not** prevent marking from acidic/alkaline substances.
- If in doubt use baking parchment/grease proof paper to protect the marble.
- Use a trivet or matt to prevent scratching and provide protection when using with hot items.

MAINTANENCE

- Stain Stop protective coating should be re applied every 6- 12 months depending on frequency of use. Craster recommends Lithofin MN Stain-Stop.
